

GOGEBIC COUNTY JAIL PROJECT

The following information is for the installation and sound proofing of walls for the Gogebic County Jail's Inmate Multi-Purpose room. (See attached drawing).

1. The two 26 foot walls shall be furred out using 2"x4"s flat on 2 foot centers against the existing block walls anchored in such a manner as to not let loose. The space between to be filled with 1 ½ inch blue Styrofoam sealed tight in such a manner as to not having any space between foam and studs. These walls shall be covered in 5/8 inch sheet rock, taped and finished and painted a color that is chosen.
2. The interior dimensions of the interior walls shall be 7 foot by 8 foot. The room shall be framed with 2"x6" on 16 inch centers. These walls shall be anchored in such a manner as to not loosen. These walls shall be packed with fiberglass insulation. They shall be sheeted with 7/16 inch OSB board and then sheet rocked with 5/8 inch. This shall be both sides of the walls. They shall be taped and finished and then painted with the color that is chosen. (See attached diagram)
3. The two existing doors shall be fitted with door sweeps to make sure they are sealed tight to eliminate as much noise as possible.
4. The electrical conduit and boxes along the sealing shall be moved as to not obstruct the installation of walls and to make sure there is access to any junction boxes as needed. There shall be two outlets provided on the interior of the 7'x8' room along with proper lighting. Two CAT 6 network cables to be run from the server room above the secured ceiling to room. Once in room they must be in conduit and run to the Northeast corner of room. County IT will supply cable and terminate ends.
5. The heat vent and cold air return vent shall be extended as needed.

All bids shall include prices for all parts of the project.

**THIS CAN BE A WINTER PROJECT FOR INTERESTED CONTRACTORS.
PROJECT TO BE COMPLETED NO LATER THAN APRIL 1ST, 2020**

SEALED BIDS DUE NO LATER THAN SEPTEMBER 18, 2019 AT NOON.
